

Mobilità elettronica in Si a diversi drogaggi

Mobilità elettronica in Si a diversi drogaggi

Mobilità elettronica in Si a diversi drogaggi

Mobilità elettronica in Si a diversi drogaggi

10 cm
 \updownarrow
 (10/20)·4 = 2 decadi

$$\alpha_1 = - \frac{4 \text{ decadi}}{2 \text{ decadi}}$$

$$\alpha_1 = - 2$$

piccoli errori di lettura su scala log comportano incertezze significative sui parametri derivati

Mobilità elettronica in Si a diversi drogaggi

15 cm
 \updownarrow
 (15/20)·4 = 3 decadi

$$\alpha_4 = - \frac{3 \text{ decadi}}{3 \text{ decadi}}$$

$$\alpha_4 = - 1$$

Mobilità elettronica in Si a diversi drogaggi

$$\alpha_4 = - 1$$
