

MAURO ROVERE – PUBLICATION LIST

86. D. Corradini, P. Gallo and M. Rovere
Structure and thermodynamics of supercooled aqueous solutions: ionic solutes compared with water in a hydrophobic environment.
Accepted for publication on J. Mol. Liq. (2010).
85. P. Gallo, M. Rovere and S.-H. Chen
Anomalous dynamics of water confined in MCM-41 at different hydrations.
Accepted for publication on J. Phys. Cond. Matt. (2010).
84. D. Corradini, M. Rovere and P. Gallo
A route to explain water anomalies from results on an aqueous solution of salt.
Accepted for publication on J. Chem. Phys. (2010).
83. D. Corradini, P. Gallo and M. Rovere
Molecular dynamics simulations of an aqueous solution of salts for different concentrations.
Accepted for publication on J. Phys. Cond. Matt. (2010).
82. D. Corradini, P. Gallo, M. Rovere
Structural properties of supercooled sodium chloride aqueous solutions.
Accepted for publication on the International Journal of Liquid State Science, 2010.
81. P. Gallo, M. Rovere and S.-H. Chen
Dynamic crossover in supercooled confined water: understanding bulk properties through confinement.
J. Phys. Chem. Lett. **1**, 729 (2010).
80. P. Gallo, A. Attili and M. Rovere
Mode Coupling behavior of a Lennard Jones binary mixture upon increasing confinement.
Phys. Rev. E **80**, 061502 (2009).

79. D. Corradini, P. Gallo and M. Rovere
Thermodynamics of Supercooled Water in Solutions.
Journal of Physics: Conference Series **177**, 012003 (2009).
78. D. Corradini, P. Gallo and M. Rovere
Effect of concentration on the thermodynamics of sodium chloride aqueous solutions in the supercooled regime.
J. Chem. Phys. **130**, 154511 (2009).
77. D. Corradini, P. Gallo and M. Rovere
Thermodynamic behaviour and structural properties of an aqueous sodium chloride solution upon supercooling.
J. Chem. Phys. **128**, 244508 (2008).
76. P. Gallo and M. Rovere
Structural properties and liquid spinodal of water confined in a hydrophobic environment.
Phys. Rev. E **76**, 061202 (2007).
75. P. Gallo, M. Minozzi and M. Rovere
Spinodal of supercooled polarizable water.
Phys. Rev. E **75**, 011201 (2007).
74. V. De Grandis, P. Gallo and M. Rovere
The phase diagram of confined fluids.
J. Mol Liq. **134**, 90 (2007).
73. V. De Grandis, P. Gallo and M. Rovere
Liquid-liquid coexistence in the phase diagram of a fluid confined in fractal porous materials.
Europhys. Lett. **75**, 901 (2006).
72. P. Gallo and M. Rovere
Glass transition in confinement.
Proceedings of the "Second International Conference on Flow Dynamics", Edited by M. Tokuyama and S. Maruyama,
AIP Conference Proceedings, vol. 832, p. 81 (2006).

71. A. Attili, P. Gallo and M. Rovere
Mode Coupling behaviour of a Lennard Jones binary mixture: a comparison between bulk and confined phases.
J. Chem. Phys. **123**, 174510 (2005).
70. V. De Grandis, P. Gallo and M. Rovere
The phase diagram of confined fluids.
Proceedings of the Symposium in honour of M.P. Tosi, *Highlights in the quantum theory of condensed matter.*, Edited by F. Beltram, p.3
Edizioni Scuola Normale, Pisa 2005.
69. A. Attili, P. Gallo and M. Rovere
Inherent Structures and Kauzman Temperature of confined liquids.
Phys. Rev. E **71**, 031204 (2005).
68. Paola Gallo, Andrea Attili and Mauro Rovere
Glass Transition in confinement: a Lennard-Jones binary mixture study.
Computer Physics Commun. **169**, 214 (2005).
67. Paola Cristofori, Paola Gallo and Mauro Rovere
Local order in aqueous solutions of rare gases and the role of the solute concentration: a computer simulation study with a polarizable potential.
Mol. Phys. **103**, 501 (2005).
66. V. De Grandis, P. Gallo and M. Rovere
Computer simulations of the phase diagram for a fluid confined in a fractal and disordered porous material.
Phys. Rev. E **70**, 061505 (2004).
65. V. De Grandis, P. Gallo and M. Rovere
Computer simulations of structural properties of dilute aqueous solutions of rare gases from ambient to supercritical conditions.
Proceedings of the International School of Physics Enrico Fermi, course CLV, The physics of complex systems (New Advances and Perspectives),2004.
64. P. Gallo, A. Attili and M. Rovere
Slow dynamics of a confined supercooled binary mixture in comparison

- with the bulk phase.*
Phil. Mag. **84**, 1397 (2004).
63. P. Gallo, R. Pellarin and M. Rovere
Slow dynamics of a confined supercooled binary mixture II: Q space analysis.
Phys. Rev. E **68**, 061209 (2003).
62. P. Gallo and M. Rovere
Anomalous dynamics of confined water at low hydration.
J. Phys. : Condens. Matter **15** , 7625 (2003).
61. M. Rovere and P. Gallo
Effects of confinement on static and dynamical properties of water.
European Physical Journal E **12** , 77 (2003).
60. P. Gallo, R. Pellarin and M. Rovere
Slow dynamics of a confined supercooled binary mixture: direct space analysis.
Phys. Rev. E **67**, 041202 (2003).
59. P. Gallo and M. Rovere
Double dynamical regime of confined water.
J. Phys.: Condens. Matter **15**, 1521 (2003).
58. V. De Grandis, P. Gallo and M. Rovere
Computer simulations of structural properties of dilute aqueous solutions of argon at supercritical conditions.
J. Chem. Phys. **118**, 3646 (2003).
57. M. Rovere and P. Gallo
Strong layering effects and anomalous dynamical behaviour in confined water at low hydration.
J. Phys. : Condens. Matter **15**, S145 (2003).
56. P. Gallo, R. Pellarin and M. Rovere
Single particle dynamics of a confined Lennard-Jones binary mixture in the supercooled regime.
Physica A **314**, 530 (2002).

55. C. Fusco, A. Fasolino, P. Gallo, A. Petri and M. Rovere
Microscopic two-dimensional lattice model of dimer granular compaction with friction.
Phys. Rev. E **66**, 031301 (2002).
54. P. Gallo, M. Rapinesi and M. Rovere
Confined water in the low hydration regime.
J. Chem. Phys, **117**, 369 (2002).
53. C. Fusco, P. Gallo, A. Petri and M. Rovere
Slow dynamics of k-mers on a square lattice.
Phil. Mag. B **82**, 375 (2002).
52. P. Gallo, R. Pellarin and M. Rovere,
Mode Coupling relaxation scenario in a confined glass former.
Europhys. Lett. **57**, 212 (2002).
51. P. Gallo, M.A. Ricci and M. Rovere
Supercooled Confined Water and the Mode Coupling Scenario.
Physica A **304**, 53 (2002).
50. C. Fusco, P. Gallo, A. Petri and M. Rovere
Stretched exponential relaxation in a diffusive lattice model.
Phys. Rev. E **65**, 026127 (2002).
49. P. Gallo, M. A. Ricci and M. Rovere
Layer Analysis of the Structure of Water Confined in Vycor Glass.
J. Chem. Phys. **116**, 342 (2002).
48. C. Fusco, P. Gallo, A. Petri and M. Rovere
Random sequential adsorption and diffusion of dimers and k-mers on a square lattice.
J. Chem. Phys. **114**, 7563 (New York 2001).
47. P. Gallo, M. Rovere, E. Spohr
Glass transition and layering effects in confined water: a computer simulation study.
J. Chem. Phys. **113**, 11324 (2000).

46. P. Gallo, M. Rovere, E. Spohr
Supercooled confined water and the Mode Coupling crossover temperature.
Phys. Rev. Lett. **85**, 4317 (2000).
45. P. Gallo and M. Rovere,
Molecular dynamics study of the glass transition in confined water.
Journal de Physique IV **10** Pr7-203 (Paris 2000).
44. M. Rovere and P. Gallo
Numerical simulation of structural and dynamical properties of confined liquids.
Lecture notes della XI Scuola Nazionale di Fisica della Materia, "Statistical Physics of complex fluids and fluids in complex geometries."
Torino Villa Gualino 4-9 Settembre 2000.
43. M. A. Ricci and M. Rovere
Studies of water in confinement by experiments and simulations.
Journal de Physique IV **10**, Pr7-187 (2000).
42. M.A. Ricci, F. Bruni, P. Gallo, M. Rovere and A. K. Soper
Water in confined geometries: experiments and simulations.
J. Phys.: Condens. Matter **12**, A245 (2000).
41. P. Gallo, M. Rovere, M. A. Ricci, C. Hartnig, E. Spohr,
Non-exponential kinetic behavior of confined water.
Europhys. Lett. **49**, 183 (2000).
40. C. Hartnig, W. Witschel and E. Spohr, P. Gallo, M. A. Ricci and M. Rovere
Modifications of the hydrogen bond network of liquid water in a cylindrical SiO₂ pore.
J. Mol. Liq. **85**, 127 (2000).
39. P. Gallo, M. Rovere, M. A. Ricci, C. Hartnig, E. Spohr
Evidence of glassy behaviour of water molecules in confined states.
Phil. Mag. B **79**, 1923 (1999).

38. E. Spohr, C. Hartnig, P. Gallo and M. Rovere
Water in porous glasses. A computer simulation study.
J. Mol. Liq. **80**, 165 (1999).
37. M. Rovere, M. A. Ricci, D. Vellati and F. Bruni
A molecular dynamics simulation of water confined in a cylindrical SiO₂ pore.
J. Chem. Phys. **108**, 9859 (1998).
36. L. Strigari, M. Rovere and B. D'Aguzzo
Theory of gas-gas phase transition in rare gas binary mixtures.
J. Chem. Phys. **105**, 2020 (1996).
35. C.M. Carbonaro, R. Bertoni, F. Meloni and M. Rovere
Collective behavior in single-electron charging regime through classical molecular dynamics.
Phys. Rev. B **53**, 10154 (1996).
34. P. Dore, L. Finzi, A. Nucara, P. Postorino and M. Rovere
Translational absorption band in low density mixtures of noble gases: the He-Xe case.
Mol. Phys. **84**, 1065 (1995).
33. P. Postorino, M. Nardone, M.A. Ricci and M. Rovere
Inelasticity effects in the neutron diffraction measurements from water steam using pulsed sources.
J. Mol. Liq. **64**, 221 (1995).
32. M. Rovere and G. Pastore
Phase separation in fluid binary mixtures of asymmetric non-additive hard spheres.
J. Phys. Condens. Matter **6**, A163 (1994).
31. M. Rovere
Computer simulation of critical phenomena in fluids.
J. Phys. Condens. Matter, **5** suppl. 34B, b193 (1993).
30. M. Vendruscolo, A. Fasolino and M. Rovere
A mean field study of the temperature dependence of the layer magne-

- tizations in a semi-infinite Ising model.*
Nuovo Cimento **D15**, 541 (1993).
29. M. Rovere, P. Nielaba and K. Binder
Simulation studies of gas-liquid transitions in two dimensions via a subsystem-block-density distribution analysis.
Z. Phys. **B 90**, 215 (1993).
 28. M. Vendruscolo, M. Rovere and A. Fasolino
Magnetic phase transitions of Ising surfaces with modified surface-bulk coupling: a Monte Carlo study.
Europhys. Lett.**20**, 547 (1992).
 27. M. Rovere and G. Pastore
Phase equilibrium in liquid binary mixtures of non-additive hard spheres.
Physica Scripta **T45**, 251 (1992).
 26. Z. Badirkhan, M. Rovere and M.P. Tosi
Liquid-solid transition in the bond-particle model for elemental semi-conductors.
Phil. Mag. B **65**, 921 (1992).
 25. Z. Badirkhan, M. Rovere and M.P. Tosi
Freezing of liquid alkali metals as screened ionic plasmas.
J. Phys. : Condens. Matter **3**, 1627 (1991).
 24. D.W. Heermann, P. Nielaba and M. Rovere
Hybrid molecular dynamics.
Computer Physics Commun. **60**, 311 (1990).
 23. M. Rovere, D.W. Heermann and K. Binder
The gas-liquid transition of the two-dimensional Lennard-Jones fluid.
J. Phys.: Condens. Matter **2**, 7009 (1990).
 22. Z. Badirkhan, A. Ferrante, M. Rovere and M.P. Tosi
Statistical mechanical models for liquid and amorphous structure in covalently bonded systems.
Nuovo Cimento **12**, 619 (1990).

21. M. Rovere, G. Senatore and M.P. Tosi
Ordering transitions induced by Coulomb interactions.
Progress on Electronic properties of solids, p. 221-238,
R. Girlanda et al. eds. (1989).
20. M. Rovere, D.W. Heermann and K. Binder
Block density distribution function analysis of two dimensional Lennard-Jones fluids.
Europhys. Lett. **6**, 585 (1988).
19. M.P. Tosi, M. Rovere and B. D'Aguanno
Liquid structure and freezing of metals and salts.
Z. Phys. Chem. **156**, 411 (1988).
18. M. Rovere and M.P. Tosi
Liquid structure and freezing of metals and molten salts.
Amorphous and liquid materials, p 118,
E. Lüscher, G. Fritsch and G. Jacucci eds. (1987).
17. B. D'Aguanno, M. Rovere and G. Senatore
Thermodynamic consistency and entropy change in the density-wave theory of freezing.
Phys. Chem. Liq. **16**, 157 (1987).
16. M. Rovere and M.P. Tosi
Structure and dynamics of molten salts.
Rep. Prog. Phys. **49**, 1001 (review paper, 1986).
15. M. Rovere and M.P. Tosi
Freezing of a modulated liquid: the superionic-to-normal transition of strontium chloride.
Solid State Commun. **55**, 1109 (1985).
14. P. Ballone, G. Pastore, M. Rovere and M.P. Tosi
Liquid structure and freezing of the two-dimensional classical electron fluid.
J. Phys. C: Solid State Phys. **18**, 4011 (1985).

13. P. Ballone, G. Pastore, M. Rovere and M.P. Tosi
Structure and crystallization of the 2D classical electron fluid.
Festkörperprobleme **XXV**, 539 (1985).
12. M. Rovere and M.P. Tosi
On the density wave theory of classical Wigner crystallization.
J. Phys. C: Solid State Phys. **18**, 3445 (1985).
11. B. D'Aguanno, M. Rovere, M.P. Tosi and N.H. March
Freezing of ionic melts into normal and superionic phases.
Phys. Chem. Liq. **13**, 113 (1983).
10. M. Rovere, M.P. Tosi and N.H. March
Freezing theory of RbCl.
Phys. Chem. Liq. **12**, 177 (1982).
9. W. Andreoni, M. Rovere and M.P. Tosi
Coordination of heterovalent cation impurities in molten salts.
Phys. Chem. Liq. **12**, 37 (1982).
8. L. Blum, M. Rovere and A.H. Narten
Dynamic corrections for neutron scattering of water in the free molecule approximation.
J. Chem. Phys. **77**, 2647 (1982).
7. D.K. Chaturvedi, M. Rovere, G. Senatore and M.P. Tosi
Liquid alkali metals and alloys as electron-ion plasmas.
Physica **111B**, 11 (1981).
6. M. Rovere, L. Blum and A.H. Narten
The inelasticity correction for heavy water.
J. Chem. Phys. **73**, 3729 (1980).
5. G. Senatore, M. Rovere, M. Parrinello and M.P. Tosi,
Structure and thermodynamics of two-component classical plasmas in the mean spherical approximation.
Nuovo Cimento **B56**, 39 (1980).

4. M. Rovere, R. Miniero, M. Parrinello and M.P. Tosi
Gas-liquid transition in charged fluids.
Phys. Chem. Liq. **9**, 11 (1979).
3. M. Rovere, M. Parrinello, M.P. Tosi and P.V. Giaquinta
Small angle scattering from molten salts.
Phil. Mag. B **39**, 167 (1979).
2. M. Rovere and E. Tosatti
Contribution of frequency dependent optical phonons to the binding energy of small radius excitons.
Nuovo Cimento **39**, 538 (1977).
1. F. Bassani and M. Rovere
Biexciton binding energy in Cu_2O .
Solid State Commun. **19**, 887 (1976).
